Reflections 2022 An In-Depth Look at Mississippi's Economy

This workforce product was funded by a grant awarded by the U.S. Department of Labor's Employment and Training Administration. The product was created by the recipient and does not necessarily reflect the official position of the U.S. Department of Labor. The U.S. Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership. Methodology

Intended as an aide to state and local workforce development boards and policymakers, this publication is produced using quantitative data to evaluate trends in Mississippi's economy. There are numerous ways to measure economic activity, but in many cases the data are not available below state levels. To provide insight and challenges for microgeographic areas, focus was placed on five commonly available sub-state measures.

Five sectors considered include: population, labor force, employment by industry, per capita income, and sales tax revenues. Generally, it's best to examine both long- and short-term trends to understand where the state's economy has been and where it might be headed, therefore statistics across five years are examined. When possible, data is provided at the following levels: Statewide, County, Metropolitan Statistical Area (MSA) and Workforce Development Area (WDA).

Mississippi Department of Employment Security (MDES) analysts endeavor to be objective and thorough, within the limits of available data. Statistics contained in this publication were generated internally by the Labor Market Information (LMI) Department of MDES with some exceptions. Population figures were derived from U.S. Census Bureau data, per capita income was extracted from tables produced by the U.S. Bureau of Economic Analysis (BEA), and sales tax collection figures originate from Mississippi Department of Revenue annual reports.

Publications and other data sets that might be of use to policymakers and workforce development board staff are produced periodically by the LMI Department. These can be accessed at our website: mdes.ms.gov. Inquiries regarding the data and analysis found in this publication should be directed to <u>lmi-info@mdes.ms.gov</u>.

Area Population

Over the last five years losses continued, but some counties showed annual increases.

The state lost 42,822 residents during the period of 2018 to 2022, the sixth annual loss. When analyzing differences over the year, the state posted a slight 0.3 percent drop. There were eighteen counties that grew in population from 2018 through 2022. DeSoto (+5.1%) County added 9,317 residents, Madison (+5.2%) County gained 5,462, Rankin (+3.0%) County grew by 4,702, and Harrison (+2.3%) County had 4,693 more residents. Lafayette County had the highest percent gain increasing 7.3 percent (+3,898 net change) followed by Madison and DeSoto Counties. When comparing the six counties in the state with populations greater than 100,000, only Hinds County suffered a loss in residents.

Of the nine counties in the state that lost 10.0 percent or more of their population since 2018, those with the greatest percentage losses are Sharkey at 19.7 percent, Quitman with a 19.2 percent decrease, and Tallahatchie with a 14.2 percent decline. Smith (-11.7%), Calhoun (-11.4%), Yazoo (-11.0%), Kemper (-10.9%), Coahoma (-10.8%), and Humphreys (-10.7%) Counties finish out the list.

Three counties with the highest net losses over the five-year period include Hinds, which lost 18,317 residents, the largest loss, a 7.7 percent fall; Lauderdale decreased 4,599 in population, or 6.1 percent; and Warren County had a reduction of 3,447, a 7.5 percent drop.

Gulfport-Biloxi-Pascagoula and Hattiesburg MSAs gained residents over the five-year period, 5,330 and 5,597 respectively. Jackson MSA lost a total of 3,579 or 0.6 percent over the year; contributing to the 13,080 or 2.3 percent decrease during the same five-year time frame.

All four Workforce Development Areas in the state had population declines from 2018 to 2022. Twin Districts and Mississippi Partnerships experienced over the year net increases in 2022, adding 1,084 and 735 residents respectively.

Labor Market

Unemployment rates are historically low, with the state rate falling to a series record.

Data for the labor market comes from Local Area Unemployment Statistics (LAUS), which measures employment by place of residence. As we look at labor force changes within the state over the last five years, we see characteristic fluctuations, except that unemployment rates declined in all 82 counties. Sixty-three counties had unemployment rates of 5.0 percent or less—the estimate used as the noncyclical rate of unemployment¹. Low rates usually indicate a demand for workers. The 2022 unemployment rate in Mississippi was 3.9 percent, a new series low. The unemployment rate in the

¹ <u>Noncyclical Rate of Unemployment (NROU) | FRED | St. Louis Fed (stlouisfed.org);</u> <u>https://fred.stlouisfed.org/series/NROU/</u> and <u>An Update to the Budget and Economic Outlook: 2021 to</u> <u>2031 | Congressional Budget Office (cbo.gov)</u>; https://www.cbo.gov/publication/57218

U.S. was 3.6 percent, and the employment-population ratio was 60.0 percent with Mississippi registering the second lowest proportion of employed persons in 2022 among the states, at 52.7 percent.²

The state civilian labor force declined from 2018-2022 by 17,100 or 1.3 percent, but because individuals move between employment and unemployment, as some reach working age and others leave the workforce, careful evaluation of any loss is needed.³ Some labor market decreases can be attributed to workers reaching retirement age, departures during the recent pandemic, and those moving to areas with job openings matching their skill sets. Policymakers can nurture the labor market and aid those looking for work or in changing careers by entreating new businesses, offering specialized training programs, and promoting higher education throughout the state.

An examination of changes over a five-year period shows twenty-two counties with labor force growth. Clay County increased its labor force by 13.2 percent, the single county with growth over 10 percent. A portion of the growth could be attributed to construction jobs for a new solar plant, and the level may remain until 2024 when building is scheduled to be complete. Despite the increase in labor force, the unemployment rate in Clay County was 4.1 percent in 2022, two-tenths of a percentage point higher than the state rate. The second highest labor force percent change was Union County at 4.5 percent, followed by Stone County which increased 3.7 percent. Lamar County was fourth highest in percent change (+3.6 percent). Rankin and Union counties had the lowest unemployment rate in the state, 2.9 percent, followed by Lamar and Madison at 3.1 and Lafayette and DeSoto at 3.2 percent.

Eight counties had labor force decreases over 10.0 percent. Issaquena (-18.4) and Sharkey (-18.0) counties both had net changes over 18 percent, between 2018 and 2022, while Washington County suffered a 14.5 percent loss over the same time. The highest unemployment rate in 2022 was found in Jefferson County; however, at 12.8 percent, it is the lowest rate for the county over the past five years. Claiborne County faced the second highest unemployment rate in 2022 at 8.2 percent and its labor force fell 3.6 percent.

In 2022, unemployment rates for Hattiesburg and Jackson MSAs were 3.5 percent while the Gulfport-Biloxi-Pascagoula MSA rate was 4.0 percent. While unemployed levels declined in all MSAs over the five-year period, only Hattiesburg and Gulfport-Biloxi-Pascagoula had positive net changes in employed numbers. Analyzing civilian labor force changes from 2018 to 2022, shows Jackson MSA lost 2.0 percent, the only MSA which had not returned to pre-pandemic levels.

Mississippi Partnership, of which Clay County is part, was the sole WDA registering growth in civilian labor force over the five-year period from 2018 to 2022 with a slight increase of 0.3 percent;

² <u>Regional and State Unemployment, 2022 Annual Average Summary - 2022 A01 Results (bls.gov)</u> https://www.bls.gov/news.release/srgune.nr0.htm

³ <u>Research series on labor force status flows from the Current Population Survey : U.S. Bureau of Labor</u> <u>Statistics (bls.gov)</u> https://www.bls.gov/cps/cps_flows.htm

additionally, it had the lowest unemployment rate at 3.6 percent. In the Mississippi Partnership WDA the five county area of Tippah, Prentiss, Union, Lee and Pontotoc showed strong growth with each county having increases in labor force and employment. Delta WDA's labor force has declined annually since 2018; over the last five years, it suffered an 8.9 percent decrease in workers (-8,360 net) and its 5.3 percent unemployment rate is highest among the WDAs.

Unemployment Insurance Benefits

Statewide payments were the lowest paid in over 40 years.

Benefit payments from Unemployment Insurance (UI) fell a whopping 42.6 percent from 2018 to 2022. The total paid statewide was \$36,827,159, the lowest in over 40 years. Benefits decreased in all but one county from the period of 2018 to 2022 with seven counties reducing payments by over 60.0 percent. Pontotoc was the single county with an increase in payments of only 3.0 percent, or \$13,233. We look at decreasing benefit payments as a gauge for economic improvement as well as growing employment. The particularly low amount of total benefits paid in 2022 is a hopeful sign.

Eight counties made payments of over one million dollars while nine counties paid less than \$100,000 in 2022. Hinds County paid over three million dollars in UI benefits in 2022, a decrease of over 2.7 million dollars from 2018. Harrison County paid close to two million dollars which was a decrease from 2018 of over 1.6 million.

The Metropolitan Statistical and Workforce Development Areas all decreased payments in 2022 with Jackson MSA and Mississippi Partnership WDA leading their equivalents in highest amount of payments made. Jackson MSA paid over \$6 million in payments, while Mississippi Partnership paid over \$10 million in UI benefits. Recovery from the pandemic two years earlier seems to be occurring rapidly for the state.

Covered Employment & Industry Trends

Most sectors witnessed growth over the year.

Employment covered under the Mississippi Employment Security law posted an overall net gain of 14,158 jobs from 2018 to 2023 increasing 1.3 percent. The Trade, Transportation & Utilities supersector had an increase of 12,554 jobs over the same five-year period, with the Transportation & Warehousing sector contributing to the bulk of the increase with a gain of 21.7 percent, or 10,784 more jobs. The Professional & Business Services super-sector grew 7.5 percent, adding 8,272 jobs, with a large amount from the Professional & Technical Services sector, which increased 18.1 percent since 2018, for an additional 5,774 jobs. Super-sectors with the largest decreases over the last five years were Education and Health Services which lost 4,499 jobs, Leisure & Hospitality lost 2,715 jobs, Public Administration lost 2,379 jobs, and Natural Resources & Mining lost 1,838 jobs, with the Mining sector losing 17.1 percent alone, or 682 jobs.

Covered employment data at the county, MSA, and WDA levels is based on place of work. Some counties with large increases were Desoto, Marshall, Rankin, Madison, and Clay. DeSoto, Marshall, and Madison Counties' largest increases were in the Trade, Transportation & Utilities super-sector, with Marshall's increase being a significant increase of more than double. The Professional & Business Services super-sector accounted for most of Rankin County's increase. Clay County experienced an extraordinarily large increase in the Manufacturing super-sector with an additional large increase in the Construction super-sector.

The Mississippi Partnership is the only WDA that had overall growth in the five-year period with an increase of 10,924 jobs or 3.5 percent. The Trade, Transportation, and Utilities super-sector had 10,230 more jobs and Manufacturing jobs increased by 2,127 over the five-year period.

The Delta WDA had the largest decrease in covered employment over the five-year period with a loss of 9.4 percent, or 8,267 less jobs. All super-sectors had losses except Manufacturing which managed a 0.6 percent increase, an additional 51 jobs. The Leisure & Hospitality super-sector had a large net loss over the five-year period, with a 19.4 percent drop (-2,422 jobs). The Professional & Business Services super-sector lost 1,772 jobs for a 31.1 percent decline; the Education & Health Services super-sector lost 1,289 jobs or a 5.1 percent loss.

The Southcentral Mississippi Works WDA also had a decline of over 5,000 jobs, losing 7,696 jobs or 2.4 percent. The Education & Health Services super-sector had the greatest loss in jobs at 3,731, a 4.1 percent decrease. Professional & Business Services, Information, Public Administration, Leisure & Hospitality, and Financial Activities super-sectors all lost over 1,000 jobs each. Only the Trade, Transportation, & Utilities and Construction super-sectors made gains from 2018-2022 adding 1,768 (+2.6 percent) and 1,284 (+10.2 percent) respectively. The Twin Districts WDA had minimal change over the five-year period. Manufacturing was the only super-sector in the Twin Districts WDA with a change of 1,000 or more since 2018 – increased 1,000 or 2.1 percent.

Per Capita Income

Mississippi's Per Capita Income grew 24.3 percent since 2017.

Per capita income (PCI) is tabulated quarterly and annually for states and counties by the U.S. Bureau of Economic Analysis (BEA). The bureau releases PCI data in November each year, after this publication is released, therefore LMI analysts chose to use 2021 figures for evaluation. PCI is calculated by dividing the total personal income of residents by the total population in an area. It is continually used as a measure of overall economic health however not a flawless statistic. If an area has a large concentration of residents that make little to no contribution to total income, for example: children, PCI is likely to skew downward.

Although incomes vary throughout counties, Mississippi ranks fiftieth in the U.S. in per capita income according to the BEA. Mississippi's PCI stands at \$45,881, well below the United States' which is \$64,143. In 2021, however, all 82 counties experienced growth in PCI from 2017, each increasing over 16 percent. Twenty-one counties had increases over \$10,000 from 2017-2021. Sixteen counties have totals above the state total. Madison is the only county in Mississippi with per capita income greater than the U.S., standing at \$73,485 and increasing 20.1 percent over the five-year period. Rounding out the top five spots in the state in total PCI is Lee County at \$51,703, Rankin County with \$51,235, DeSoto County at \$50,982, and Sharkey County at \$50,467. Counties with the highest net change over the fiveyear period are Issaguena, Sharkey, Quitman, Leflore, and Noxubee. Even though Issaguena's PCI at \$34,832 was a whopping 87.6 percent change, it is still well below the state's average and a little over half of the U.S. total. Quitman County's PCI grew 43.8 percent or \$12,695 to \$41,682, while Sharkey County's PCI increased 41.2 percent or \$14,728. Two counties that had the lowest net change from 2017 were Green and Leake. Green County nevertheless managed to add 19.1 percent to its PCI, while Leake County's PCI rose by 18.0 percent. The county with the lowest percent change from 2017 was Rankin which gained 16.9 percent over the five-year period. Chickasaw County had the next lowest percent change at 17.1 percent followed by Forrest County at 17.3 percent.

All Metropolitan Statistical Areas had increases above 19.0 percent over the five-year period. Jackson MSA again ranked highest in PCI at \$52,434. All Workforce Development Areas grew in PCI by over 20.0 percent. Delta WDA experienced a 31.8 percent increase, but still had the lowest total PCI at \$43,512. Twin Districts WDA ranked last in net and percent change while Southcentral Mississippi Works had the largest total PCI at \$49,601, the only WDA with PCI higher than the state total.

Sales Tax Collections

Sales tax collections increased over 20 percent from 2018-2022.

Robust consumer spending is usually a signal of good financial health. Confidence in the marketplace often correlates to a healthy economy but rising expenses likewise impact tax collections. Tax revenues provide support for state operations; therefore, sales taxes collections are crucial. Mississippi sales tax collections increased over \$670 million in the period from 2018-2022 for a record total of \$3,935,117,978. The Mississippi Department of Revenue reported that 35.5 percent of collected taxes were sales taxes. ⁴ Five counties with the highest amounts collected in 2022 were Harrison at \$363,381,314, up 20.6 percent in the five-year period, Hinds at \$324,603,374 up 6.9 percent, Rankin at \$297,984,036 up 23.8 percent, DeSoto at \$289,254,983 up 29.7 percent, and Madison at \$204,359,381 up 27.0 percent. Hinds County, with the lowest percentage increase of the top five, is one of twelve counties with less than 7.0 percent growth since 2018. The seven counties with losses between 2018

⁴ Mississippi Department of Revenue Annual Report Fiscal Year 2022, page 14; <u>https://www.dor.ms.gov/sites/default/files/Statistics/MSDOR%20Annual%20Report%20FY%202022.pdf</u>

and 2022 are Tunica (-13.5 percent), Franklin (-7.6 percent), Issaquena (-6.5 percent), Jefferson (-2.8 percent), Wilkinson (-1.5 percent), Benton (-1.0 percent), and Kemper (-0.2 percent).

Analyzing over the year total county collections, Rankin had the largest increase, with an additional \$24,827,517 collected. Rounding out the top five are Harrison (+\$24,423,448), DeSoto (+\$21,577,674), Madison (+\$17,734,112), and Lafayette (+\$14,907,759). Issaquena's 2022 total of \$229,076, shows a 52.9 percent increase over the year and a 130.9 percent increase since 2020, the year Covid-19 arose. Tunica County dropped 16.9 percent since 2019, before the pandemic, but over the year it showed an increase of 10.7 percent. Other changes over the year show thirteen counties experiencing losses in sales tax collections, Warren County had the largest loss with \$1,990,313 less collected. Comparing the thirteen counties with over the year losses to the seven counties with losses over the five-year period yields two, Wilkinson County and Benton County, making both lists. Benton County showed a 20.5 percent loss since 2020, the year of its highest collections between 2018 and 2022; current collections are \$1,705,933, the lowest amount during the same period.

Gulfport-Biloxi-Pascagoula MSA had the highest percent increase of the MSAs during the period of 2018-2022, a 22.3 percent rise. Jackson MSA remains in the top spot for total collections but was last in percentage increase (+17.7 percent). All MSAs suffered a slight decrease in sales tax collections from 2018 to 2019 but since then all have shown increases.

Twin Districts WDA had the most collections in 2022 with over 1.2 billion collected. Mississippi Partnership had the highest percent increase over the five-year period with 23.6 percent. Delta WDA had the least amount collected in 2022 along with the lowest net and percent increases over the five-year period.

Economic Stability Index

Marshall County experienced remarkable industry employment growth.

Typically, for this publication, five measures are chosen to use for indexing. The state is used as a base (1.000), and each county, Metropolitan Statistical Area, and Workforce Development Area was "indexed" in relation to the base. To allow for a mixture of long-term trends and current data, the latest available data were used, for others a five-year growth rate was used. The method for selecting each series indexed follows.

The first data set selected was Covered Employment growth. The 2022 state total divided by the total in 2018 yielded a growth factor ratio of 1.0128, in 2018 the ratio was 1.0263. A similar factor was developed for each area. The local factor was divided by the state factor to obtain the index. For example, if the growth factor for a particular area is .986, the resulting index would be .986 divided by 1.0128, or .974. Using the same methodology Population growth and Sales Tax growth were determined. One of the current data series chosen was Labor Force Percent Employed. Percent employed was selected instead of the more commonly reported percent unemployed since the larger

numbers produced less volatility in the index. Also, since lower is better when looking at percent unemployed, the ratio would have had to be reversed to produce the desired effect of measuring it versus the state. The other current series selected is Per Capita Income. In this case, the area's PCI is divided by the statewide figure to obtain the index. The five separate indexes are added to produce a composite index. The counties, Metropolitan Statistical Areas, and Workforce Development Areas are ranked according to the composite score. Considering the strengths and weaknesses of each entity, this composite index expectantly produces a method by which to make valid comparisons between areas.

Marshall, Madison, Desoto, and Rankin again ranked as the top four in 2022. Tate County ranked fifth this year, moving up five spots from last year. New counties moving into the top ten ranks in 2022 from 2021 were Clay, at seventh from the thirty-first spot; Lafayette, at nineth from twenty-second; and Lee, at tenth in 2022 from eleventh in 2021. Chickasaw County experienced a large drop from 2021, falling twenty-nine places to the fifty-second spot in 2022. Clarke County fell to fifty-third from thirtieth in 2021. Twenty-two counties had index scores above 5.000 in 2022, compared to twenty-four in 2021.

All the Metropolitan Statistical Areas had indexes above the state in 2022, although only the Jackson MSA had a higher index than it did in 2021. The Jackson MSA had a composite score of 5.076, Gulfport-Biloxi-Pascagoula MSA had a ranking of 5.022, and Hattiesburg MSA had a composite score of 5.019.

Three of the WDAs had composite indexes lower than the state. With an index of 5.058, Mississippi Partnership was the sole WDA with an index increase when compared to the 2021 indexes. Southcentral Mississippi Works WDA had an index of 4.994, Twin Districts was 4.957 and Delta WDA was 4.708. All the WDA indexes changed less than a tenth of a point when compared to their 2021 indexes.

Economic Stability Index

Marshall County experienced remarkable industry employment growth.

Typically, for this publication, five measures are chosen to use for indexing. The state is used as a base (1.000), and each county, Metropolitan Statistical Area, and Workforce Development Area was "indexed" in relation to the base. All the WDA indexes changed less than a tenth of a point when compared to their 2021 indexes.

Abstract

The five-year comparison data gives mixed signals concerning Mississippi's economy.

Per Capita Income increased every year while population continued to decline each year. With an over the year loss of 9,529, the state's population decreased 42,822 from 2018 to 2022. The annual unemployment rate at 3.9% was a historic low. Sales tax collections increased over the year.

Per capita income statewide has risen 24.3% over the five-year period between 2017 and 2021, an increase of over 7 percentage points from the last year's five-year analysis. Issaquena, the state's smallest county in population, had a per capita income rise of 87.6% since 2017. All counties posted gains greater than \$5,000 in net change for this same five-year period.

Sales tax collections increased over \$200 million from last year and total collections have risen 20.6% since 2018. Seventy-five counties recorded growth in sales taxes collected since 2018. Sales tax collections over the year increased more than 10% in thirteen counties.

Mississippi paid regular unemployment benefits of \$36,827,159 in 2022, the lowest amount paid in over 40 years. The state had a decrease of 42.6% (over \$27 million) since 2018 and almost 67% from the prior year. The amount of regular unemployment benefits paid over the year decreased in all eighty-two counties in 2022.

The average unemployment rate at 3.9% decreased 1.6 percentage points from the 2021 rate. Over the five-year period the state average unemployment rate decreased one percentage point. The 2022 average unemployment rate was the lowest rate for all counties during the five-year period.

Since 2018, Covered employment in Mississippi increased to 1,119,793 (the highest level during the five-year period) representing a gain of 14,158 jobs. The average monthly employment increased by 28,238 over the year. The sector most negatively affected by the pandemic, Accommodation and Food Services had the largest yearly increase with 5,792 jobs and was at 97% of its pre-pandemic level. The Transportation and Warehousing sector showed the largest growth since 2018 (10,784 jobs or 21.7%).

The five-year comparison data gives mixed signals concerning Mississippi's economy but over the year data primarily gives positive signs. The data shows the state has recovered from the pandemic and is in better shape. Low unemployment benefit payments also show Mississippi is on a good path for economic growth.

Phraseology

- Civilian Labor Force that proportion of the civilian noninstitutional population that is employed or actively seeking employment.
- Civilian Noninstitutional Population are persons 16 years of age and older who are not inmates of
- institutions (for example, penal and mental facilities, homes for the aged), and who are not on active duty in the Armed Forces.
- Covered Employment the number of workers for firms registered under the Mississippi Employment Security Law who earned wages during the pay period including the twelfth of the month. State and local government is included but not federal government.
- COVID-19 (referenced as COVID-19 pandemic) a respiratory illness caused by a coronavirus.
- Employed all persons who during the reference week, (a) did any work at all as paid employees, worked in their own business, profession, or on their own farm or
- worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, and
 (b) all those who were not working but who had jobs or businesses from which they were
 temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or
 paternity leave, labor management dispute, job training, or other family or personal reasons,

whether or not they were paid for the time off, or were seeking other jobs. Persons are counted only once even if they hold multiple jobs.

- Hispanic * refers to those who identified themselves in the enumeration process of the U.S. Census as being of Hispanic, Latino, or Spanish origin. These individuals are further classified by detailed Hispanic ethnicity, such as, Mexican, Puerto Rican, Cuban, Central and South American, and Other Hispanic or Latino. People whose ethnicity is identified as Hispanic or Latino may be of any race.
 [BLS]
- Industry * a group of establishments that produce similar products or provide similar services. For example, all establishments that manufacture automobiles are in the same industry. A given industry, or even a particular establishment in that industry, might have employees in dozens of occupations. The North American Industry Classification System (NAICS) groups similar establishments into industries. [BLS]
- Metropolitan Statistical Areas (MSAs) the general concept of an MSA is one of a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. These are defined by the Office of Management and Budget as a standard for Federal agencies in the preparation and publication of statistics relating to metropolitan areas.
- Pandemic disease outbreak occurring over a wide geographic area typically affecting a significant proportion of the population.
- Personal Income * is the income received by, or on behalf of, all persons from all sources: from participation as laborers in production, from owning a home or business, from the ownership of financial assets, and from government and business in the form of transfers. It includes income from domestic sources as well as the rest of world. It does not include realized or unrealized capital gains or losses. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes). [BEA]
- Unemployed all persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment during the 4week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed. Persons that are classified as unemployed have not necessarily filed or would be eligible for unemployment benefits.
- Unemployment Rate * represents the number of unemployed people as a percentage of the labor force (the labor force is the sum of the employed and unemployed). The unemployment rate is calculated as: (Unemployed ÷ Labor Force) x 100. [BLS]
- Workforce Development Areas (WDAs) these are state designated areas in which an appointed Workforce Development Board is charged with designing and managing a system that provides

convenient access to services and program information for employers, job seekers, and others in need of assistance. Multiple agencies and groups partner together to provide the services. Each board is employer led and demand driven. Mississippi is divided into four such areas.

* Definition provided by BLS or BEA as noted in brackets.
